ALEX RIVERA

alex.rivera@example.com

SUMMARY

Computer Science graduate who builds machine learning projects end to end, from data collection to a working demo.

EDUCATION

BS Computer Science, Example State University, 2021-2025
Thesis: Classifying customer support tickets with natural language processing

EXPERIENCE

Machine Learning Intern - Fictional Retail Co., Jun 2024 - Aug 2024
- Built a text classifier in PyTorch that routed customer support tickets into 12 categories
- Wrapped the model in a Python web API and packaged it in a container for the deployment team
- Wrote SQL queries to pull 80,000 labelled tickets from the company database
- Added automated tests that ran on every pull request

PROJECTS

Movie Review Sentiment Analyzer
- Fine-tuned a pretrained language model on 50,000 reviews, reaching 91% accuracy
- Deployed the demo on a cloud virtual machine so classmates could try it

Bike Share Demand Forecast
- Predicted hourly rentals from weather data using gradient boosting in scikit-learn

SKILLS

Languages: Python, SQL
Libraries: PyTorch, pandas, scikit-learn
Tools: Git, Linux
